PROBLEM 1:

Things Learned:

1. The concept of constructors in C++. <Link>
2. About non parameterized constructors.
3. Object creation in C++.
4. Difference b/w Default & Non parameterized constructor.

Problems Faced:

1. Faced some difficulties in declaring a constructor in the Class, and defining it either inside the class or outside the class.

PROBLEM 2:

Things Learned:

1. About parameterized constructors in C++. <Link>
2. Constructor Overloading in C++. <Link>
3. Difference b/w Parameterized & Non parameterized constructor.

Problems Faced:

1. Faced some difficulties in declaring a constructor in the Class, and defining it either inside the class or outside the class.
2. Issues with constructor overloading, etc.

PROBLEM 3:

Things Learned:

1. About Destructors in C++. <Link> <Link>
2. Difference b/w Constructors & Destructors.
3. Object deletion through destructors.

Problems Faced:

1. Use of destructors in object deletion.
2. Issues during its declaration and definition.
